Regulations of the Ostfildern-Nellingen Mineral Show, 2021

1. The event includes only minerals and fossils, technical collectors' accessories and specialist literature. Jewelry items are only permitted if they are individual pieces and made of natural precious stones, opals, meteorites and amber, if applicable in combination with precious metals such as platinum, gold or silver. Articles of a different nature, such as mass jewelry made of glass or plastics, wood carvings, plants, recent animal preparations, textiles, industrial products and the like are not permitted.
2. When deciding on the distribution of the stands, the organizers will attempt to respect the preferences and wishes of the dealers if possible, but the decision of the organizer is final.
3. Any registration to the show will be regarded as invalid/void if the registration fee is not credited to the organizers' bank account in due time after receiving the registration confirmation.
4. On opening the show, stands that are not occupied can be allocated to other dealers. Any refund in case of not showing up is excluded.
5. Any change of table positions is prohibited. The structure has been approved by fire department and local authorities. Any change endangers the show and will lead to the exclusion of the exhibitor concerned.
6. For safety reasons it is not allowed to expand the size a stand in any way. Any wishes in that respect must be clearly indicated with the registration. The show organizers will try to find a solution – in accordance with the facilities and regulations of the showroom.
7. The hall floor is to be protected against damage during all transport work and during the exhibition. Trolleys may only be used if they pose no risk of such damage. It is not permitted to attach advertising to walls and doors.
8. Each item offered is to be labeled with name, location and price so that the customer can clearly recognize it. Particularly sensitive and expensive pieces must be withdrawn from direct access by the public in order to prevent damage to them, damage to the visitor or theft.
9. Articles for decorative purposes only, not meant for sale, have to be declared as such in an explicit and open way. The same applies to specimens that have been mounted, repaired or have been produced artificially, exposed to artificial radiation or coloured by any means.
10. It is not allowed to use any form of lighting that influences the natural colour of the specimens. Sole exceptions to this are only ultraviolet or fluorescent lights in specially designed boxes or chambers.
11. It has to be accepted that the power of electrical current might be limited to prevent a general overload of the system.
12. All dealers are fully responsible for obeying all laws and regulations as far as customs, taxes and other obligations by the authorities are concerned.
13. Only calibrated scales certified by the authorities may be used.
14. Every exhibitor is personally held responsible for his own actions and those of his staff.
15. Every exhibitor is personally liable for any damage to, loss or theft of his or her goods or other materials. The SMF e.V. cannot accept liability for any of these.
16. In case of a cancellation of the show due to circumstances beyond the organizers' control, no claims for compensation will be accepted.
17. After the end of the show the stand has to be returned properly cleaned. Otherwise an additional fee for cleaning will be charged.
18. Dealers disregarding these regulations during the show may be excluded without prior notice.
